

Electronic Signs Daktronics/Venus 1500

Crisis Plan – May 14, 2009

Daktronics/Venus 1500

Software can be found on the help desk computers

1. Locate software and open the V15 Shell

2. Click the second button which is the "Message Studio"
3. Click "Ok" to accept settings
4. Screen will open and create your message.
5. Remember to set the "Frame Duration".
6. "File" "Save As" and save into a folder, best one to use is probably the Default folder.
7. Close all screens and go back to the Venus 1500 shell.

8. Now click on the first button which is the "Display Manager"
9. Connect to the building sign by selecting the name and double clicking. You will see the connection taking place.
10. Locate your message, right click and select run.
11. Message is running, repeat steps 9 & 10 for all buildings.
